TITLE OF INVENTION

INTERSECTED CONE-SHAPED AIR FILTER FOR AN AUTOMOTIVE INTERNAL COMBUSTION ENGINE

APPLICANT(S) FOR DO/EO/US

WIJAYA, Heru, Prasanta

Applicant herewith submits to the United States Designated/Elected Office (DO/EO/US) the following items and other information:

1. ☒ This is a **FIRST** submission of items concerning a filing under 35 U.S.C. 371.
2. ☐ This is a **SECOND** or **SUBSEQUENT** submission of items concerning a filing under 35 U.S.C. 371.
3. ☒ This is an express request to begin national examination procedures (35 U.S.C. 371(f) at any time rather than delay examination until the expiration of the applicable time limit set in 35 U.S.C. 371(b) and PCT Articles 22 and 39(1).
4. ☐ A proper Demand for International Preliminary Examination was made by the 19th month from the earliest claimed priority date.
5. ☒ A copy of the International Application as filed (35 U.S.C. 371(c)(2)).
 - a. ☒ is transmitted herewith (required only if not transmitted by the International Bureau).
 - b. ☒ has been transmitted by the International Bureau.
 - c. ☐ is not required, as the application was filed in the United States Receiving Office (RO/LUS).
6. ☐ A translation of the International Application into English (35 U.S.C. 371(c)(2)).
7. ☒ A copy of the International Search Report (PCT/ISA/210).
8. ☒ Amendments to the claims of the International Application under PCT Article 19 (35 U.S.C. 371(c)(3)).
 - a. ☒ are transmitted herewith (required only if not transmitted by the International Bureau).
 - b. ☒ have been transmitted by the International Bureau.
 - c. ☐ have not been made; however, the time limit for making such amendments has NOT expired
 - d. ☐ have not been made and will not be made.
9. ☐ A translation of the amendments to the claims under PCT Article 19 (35 U.S.C. 371(c)(3)).
10. ☒ An oath or declaration of the inventor(s) (35 U.S.C. 371(c)(4)). (UNEXECUTED)
11. ☐ A copy of the International Preliminary Examination Report (PCT/IPEA/409).
12. ☐ A translation of the annexes to the International Preliminary Examination Report under PCT Article 36 (35 U.S.C. 371(c)(5))

Items 13 to 20 below concern document(s) or other information included:

13. ☒ An Information Disclosure Statement under 37 CFR 1.97 and 1.98.
14. ☐ An assignment document for recording. A separate cover sheet in compliance with 37 CFR 3.28 and 3.31 is included
15. ☒ A **FIRST** preliminary amendment
16. ☐ A **SECOND** or **SUBSEQUENT** preliminary amendment.
17. ☐ A substitute specification.
18. ☐ A change of power of attorney and/or address letter.
19. ☒ **SMALL ENTITY** Assertion: Applicant(s) and any other associated with it/them under 37 CFR § 1.27(a) are a small entity
20. ☒ Certificate of Mailing by Express Mail.
21. ☒ Other items or information: Extra Set of Drawings

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

EXPRESS MAIL NO. EL717377784US

Applicant : Heru Prasanta Wijaya
Application No. : N/A
Filed : February 25, 2002
Title : INTERSECTED CONE-SHAPED AIR FILTER FOR AN
AUTOMOTIVE INTERNAL COMBUSTION ENGINE

Docket No. : 47963/DBP/R130

PRELIMINARY AMENDMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Post Office Box 7068
Pasadena, CA 91109-7068
February 25, 2002

Commissioner:

Please amend the above-identified application as follows:

IN THE SPECIFICATION

After the title please add the following:

-- CROSS-REFERENCE TO RELATED APPLICATION

This application claims priority of International application number PCT/IB00/00852, filed June 26, 2000--.

IN THE CLAIMS

By this Amendment, Applicant is amending claim 3, and adding new claim 5. Pending claims 1 to 5 follow.

1. An intersected cone-shaped air filter (I) for focusing air flow within an automotive internal combustion engine which comprises:

a hollow body (2) of specified thickness whose side dips 2° to 7° with respect to vertical axis and is made up of symmetric longitudinally folded filter paper material whose thickness governs the thickness of the air filter body (2),

Application No. N/A

a clamping ring (3) which is fixedly disposed along the outer periphery of the upper and the lower ends of the filter body (2) for strengthening the filter body construction; and the way out of clean air is on the top of intersected cone.

2. An intersected cone-shaped air filter according to claim 1 that has a hollow body (2') whose outer wall of the air filter body shape is cylindrical and the inner wall of the air filter body is intersected cone.

3. (Amended) An intersected cone-shaped air filter, which has a hollow body shape as described on claim 1, made of the porous material.

4. An intersected cone-shaped air filter according to claim 1 for producing driving force that increases the velocity and the mass of the air- fuel mixture.

5. (NEW) An intersected cone-shaped air filter, which has a hollow body shape as described on claim 2, made of the porous material.

REMARKS

Claims 1-4 remain in the application. Claim 3 has been amended, and claim 5 has been added. It is respectfully requested that the foregoing preliminary amendment be entered prior to examination.

Attached hereto is a marked-up version of the changes made to the claim by the current amendment. The attached page is captioned "Version with markings to show changes made."

Respectfully submitted,
CHRISTIE, PARKER & HALE, LLP

Description5 INTERSECTED CONE-SHAPED AIR FILTER FOR AN AUTOMOTIVE
INTERNAL COMBUSTION ENGINE

Technical Field of Invention

10 This invention relates to an air filter, particularly
an intersected cone-shaped air filter that can focus airflow
into an automotive internal combustion engine.

Background of Invention

15 Current automotive technology needs automotive engines
of high performance. A highly performed automotive engine
requires that fuel must be proportionately mixed with clean
air and the mixture produced can quickly reach the internal
combustion charge.

20 There are two options for the accomplishment of the
conditions cited above. The first is to minimize fluid
friction, and the second one is to exert a driving force on
the mixture. It can be performed only by designing
appropriately the aerodynamic construction of the air
25 filter.

The object of this invention is thus to provide an air
filter wherein a driving force is performed due to the
focusing of the airflow on the midmost streamline. Based on
its shape, i.e., intersected cone, the air filter is
30 referred to CYCLO FILTER.

Brief Description of the Invention

35 This intersected cone-shaped air filter is designed for
the purpose of filtering the air flowing into an automotive
internal combustion engine and focusing it to the midmost
streamline. Due to its intersected conical shape, the
effective area of this air filter's cylindrical surface is

The larger the effective area of this air filter's cylindrical surface is, the more the mass of the air-fuel mixture that will flow into the combustion chamber. And the driving force resulted in due to the focusing of air flow on the midmost streamline will increase the velocity and the mass of the air-fuel mixture within the combustion chamber. Consequently, it will be generated by the automotive engine.

Brief Description of the Drawing

15 Figure 1b is a longitudinal cross section along line
A-A of the embodiment in shown in Figure 1a.

20 Figure 2b is a longitudinal cross section along line A'-A' of the embodiment in shown in Figure 2a.

25

Figure 1a and 1b show a basic construction of an intersected cone-shaped air filter (1) comprising a hollow body (2) of specified thickness the side of which dips downwardly 2° to 7° with respect to vertical axis. The filter body is made up of symmetric longitudinally folded filter paper materials whose thickness governs the thickness of the air filter body (2).

35 A clamping ring (3) is fixedly disposed along the outer periphery of the upper and the lower ends of the filter body (2) for strengthening the filter body construction.

Figure 2a and 2b show the one of the modifications of the cone-shaped air filter, which have specific hollow body (2'). The outer wall body of the air filter shape is cylindrical and the inner wall body of the air filter shape is intersected cone.

Figure 3 is a schematic diagram showing the path of the air flow from the atmosphere into an automotive internal combustion engine. Air from the atmosphere is directed to an air filter (I) through the air filter body. Owing to the shape of the filter, the air flows through the centre of the smaller end of the filter into the mixing chamber (II). The air and fuel which have become air-fuel mixture after entering the mixing chamber, flows further into the combustion engine (III). The driving force resulted in due to the focusing of the airflow on the centre of the smaller end of the filter will increase the velocity and the mass of the air-fuel mixture within the combustion chamber.

The preferred embodiments described within this specification are intended only for illustration, not to limit the scope of invention. Modification of any kind is always possible for them skilled in the art as long as it is still within the scope of invention and claim.

Claim

1. An intersected cone-shaped air filter (1) for focusing
air flow within an automotive internal combustion
engine which comprises:
5 a hollow body (2) of specified thickness whose
side dips 2° to 7° with respect to vertical axis and
is made up of symmetric longitudinally folded filter
paper material whose thickness governs the thickness
10 of the air filter body (2),
a clamping ring (3) which is fixedly disposed
along the outer periphery of the upper and the lower
ends of the filter body (2) for strengthening the
filter body construction.
15
2. An intersected cone-shaped air filter that have a
hollow body (2') whose outer wall of the air filter
body shape is cylindrical and the inner wall of the
air filter body is intersected cone.
20
3. An intersected cone-shaped air filter, which has a
hollow body shape as described on claims 1 and 2, made
of the porous material.

AMENDED CLAIMS

[received by the International Bureau on 03 May 2001 (03.05.01);
original claims 1-3 replaced by amended claims 1-4 (1 page)]

1. An intersected cone-shaped air filter (1) for focusing air
flow within an automotive internal combustion engine which
comprises:
a hollow body (2) of specified thickness whose side
dips 2° to 7° with respect to vertical axis and is made up
of symmetric longitudinally folded filter paper material
whose thickness governs the thickness of the air filter body
(2),
a clamping ring (3) which is fixedly disposed along
the outer periphery of the upper and the lower ends of the
filter body (2) for strengthening the filter body
construction; and the way out of clean air is on the top of
intersected cone.
2. An intersected cone-shaped air filter according to claim 1
that has a hollow body (2') whose outer wall of the air
filter body shape is cylindrical and the inner wall of the
air filter body is intersected cone.
3. An intersected cone-shaped air filter, which has a hollow
body shape as described on claims 1 and 2, made of the
porous material.
4. An intersected cone-shaped air filter according to claim 1
for producing driving force that increases the velocity and
the mass of the air- fuel mixture.

Rev. 5/00 **DECLARATION AND POWER OF ATTORNEY FOR PATENT APPLICATIONS** **PATENT**

Docket No. 47963/DBP/R130

As an inventor, I declare:

My residence address and citizenship are as stated next to my name. I believe I am the original, first and sole inventor (if only one name is listed below), or a joint inventor (if plural names are listed below) of the invention claimed in the patent application entitled:

- (1) INTERSECTED CONE-SHAPED AIR FILTER FOR AUTOMOTIVE INTERNAL COMBUSTION ENGINE

the specification of which

- (2) X is attached
(3) X was filed on 26 June 2000 as Serial No. PCT/IB00/00852 and was amended on _____ (if applicable).

I have reviewed and understand the contents of the specification, including the claims, as amended by any amendment referred to above. I acknowledge the duty to disclose information which is material to the patentability of this application in accordance with 37 CFR § 1.56.

- (4) _____ I hereby claim the benefit under Title 35, U.S.C. § 119(e) of any United States provisional application(s) listed below.

Application Serial Number	Filing Date	Application Serial Number	Filing Date
---------------------------	-------------	---------------------------	-------------

- (5) _____ I claim foreign priority benefits under 35 U.S.C. § 119(a)-(d) of the foreign application(s) for patent or inventor's certificate listed below, and I have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed.

Prior Foreign Application(s)			Priority Claimed	
Number	Country	Day/Month/Year	Yes	No
Number	Country	Day/Month/Year	Yes	No

- (6) _____ I claim the benefit under 35 U.S.C. § 120 of any United States application(s) listed below, and, insofar as this application discloses and claims subject matter not disclosed in the prior United States application in the manner provided by the first paragraph of 35 U.S.C. § 112, I acknowledge the duty to disclose material information as defined in 37 CFR § 1.56 which occurred between the filing date of the prior application and the national or Patent Cooperation Treaty International filing date of this application:

Application Serial Number	Filing Date	Patented/Pending/Abandoned
Application Serial Number	Filing Date	Patented/Pending/Abandoned

I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. § 1001, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

- (7) **POWER OF ATTORNEY:** I appoint the following attorneys and agents of the law firm CHRISTIE, PARKER & HALE, LLP to prosecute this application and any international application under the Patent Cooperation Treaty based on it and to transact all business in the U.S. Patent and Trademark Office connected with either of them in accordance with instructions from the assignee of the entire interest in this application; or from the first or sole inventor named below in the event the application is not assigned, or from Biro Oktroi Roosseno in the event the power granted herein is for an application filed on behalf of a foreign attorney or agent.
